

## **Environmental Policy**

---

Approved by the board on  
August 3, 2017

---

### **Summary:**

Midas Gold is committed to maintaining sound environmental practices in all of its activities and to continuously improve the efficient use of resources, processes and materials. The Environmental Policy outlines the considerations that we will take in order to ensure that Midas Gold and its employees fulfil this commitment to make the environment a priority in everything we do.

---

Midas Gold Corp., along with its subsidiaries, (together, the “Corporation”) is committed to maintain sound environmental practices in all of its activities and to continuously improve the efficient use of resources, processes and materials.

For the Corporation to succeed in fulfilling this policy, all employees are responsible for incorporating into their work the actions necessary to take all reasonable care for the protection of the environment. As such, Midas Gold Corp. and its subsidiaries commit to the following:

- (1) Examine the potential impact to the environment of all proposed activities and take steps to minimize, mitigate or, where possible, eliminate that impact.
- (2) Operate in accordance with recognized industry standards, while complying with applicable regulations and laws.
- (3) On a regular basis, determine the Corporation’s impact to the environment and, through continuous improvement, strive to attain higher levels of environmental performance.
- (4) Minimize all hazardous and non-hazardous materials generation and ensure the proper disposal of all wastes.
- (5) Maintain a high level of environmental protection by applying reasonable best practices and technologies that minimize impacts and enhance environmental quality in respect of water, air, vegetation and wildlife.
- (6) Maintain dialogue with the communities and other stakeholders within the area of influence in order to understand their concerns, minimize negative impacts and to enhance environmental quality.
- (7) Progressively rehabilitate disturbed areas, where appropriate, and develop closure plans that can continuously improve and incorporate new technologies where practical.
- (8) Train and educate all employees to understand their environmental responsibility related to all activities related to the Corporation’s operations and activities.
- (9) Require contractors and suppliers to operate according to the Corporation’s environmental standards and procedures.
- (10) Consider environmental factors when purchasing equipment and materials.
